

MOHAMMAD FATHI ALGHAZO

Full Stack Software Engineer | Web Architect & Automation Specialist

Amman / Sweileh, Jordan | +962 77 291 3081 | mohammadalghazo2004m@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven **Full Stack Software Engineer** with a B.Sc. in Computer Science (GPA 3.54/4.0) and proven experience orchestrating the entire software development lifecycle—from architectural design and UI/UX engineering to database modeling, DevOps containerization, and production VPS deployment. Proficient in modern full-stack ecosystems (**Next.js, React, Node.js, Tailwind CSS**) as well as enterprise backend architectures (**ASP.NET Core, C#, Clean Architecture, PostgreSQL**). Demonstrated expertise in building scalable SaaS platforms, integrating LLM-powered AI capabilities, developing high-throughput Python automation workflows, and managing Linux infrastructure backed by multiple Red Hat certifications.

TECHNICAL SKILLS

Programming Languages:	TypeScript, JavaScript, Python, C#, SQL (PostgreSQL, MySQL), HTML5, CSS3, C++, Java
Frontend Frameworks:	Next.js (App Router, SSR/SSG), React.js, Angular, Tailwind CSS, Bootstrap, Responsive UI/UX
Backend & Architecture:	Node.js, Express, ASP.NET Core Web API, RESTful API Design, JWT Auth, RBAC, Clean Architecture, Repository Pattern
Databases & ORM:	PostgreSQL, MySQL, Supabase, SQL Server, Entity Framework Core, Prisma, Schema Indexing & Optimization
DevOps, Cloud & Linux:	Docker, Linux (Red Hat Enterprise Linux), Coolify, VPS Administration, Cloudflare (DNS/SSL/CDN), Render, Vercel, Git/CI-CD
Automation & AI:	Python Automation (Playwright, Requests, Web Scraping), Telegram Bot API, Webhooks, LLM & AI Chatbot Integration (Groq API, OpenAI)

WORK EXPERIENCE

Full Stack & Automation Engineer 2026 – Present

Trade Nox (نوكس للأعمال) | Amman, Jordan

- Drive end-to-end web architecture, engineering, and infrastructure delivery across all client and company digital products as the core web engineer.
- Architected and delivered **Place On (place-on.com)**, a comprehensive B2B/B2C SaaS commercial workspace marketplace in Saudi Arabia, featuring split tenant/provider onboarding portals, interactive booking request funnels, multi-criteria filtering, and an operational admin control room.
- Spearheaded the complete migration of the company’s flagship portal (**trade-nox.com**) from legacy WordPress to a modern high-performance custom stack (Next.js/Node.js) with a dedicated content and lead dashboard, boosting page speed and SEO performance.
- Configure and manage self-hosted production infrastructure on private VPS instances using **Coolify, Docker** containerization, automated GitHub deployments, and **MySQL** database provisioning.
- Built automated operational pipelines and custom scripts for business workflows, lead routing, and platform maintenance.

Freelance Full Stack Developer & Automation Specialist 2024 – 2026

Independent Contractor | Remote (Jordan & Saudi Arabia)

- Designed, built, and delivered 4+ commercial and enterprise-grade web applications for regional clients with 100% on-time milestone execution.
- Architected and deployed **Bosala (bosala.best)**, a full-featured SaaS analytics platform for Saudi e-commerce merchants tracking trending products, competitive data, and purchasing decision metrics.
- Engineered automated Python scraping pipelines for Bosala that ingest daily product trends across multi-store ecosystems, aggregate data into **Supabase (PostgreSQL)**, and generate automated subscriber intelligence reports.
- Developed customized automation bots, including a real-time financial market and commodity/gold monitoring Telegram bot and automated reservation tools using webhooks.
- Integrated AI-driven conversational assistants and external REST APIs into client web applications to automate customer interactions.

FEATURED PROJECTS

Place On — Enterprise Workspace Marketplace & SaaS

 [Live Demo \(place-on.com\)](#) | 2026

Scalable digital marketplace connecting enterprises with flexible workspaces and offices across the Kingdom of Saudi Arabia.

- Engineered multi-role authentication & profiles (Space Seekers vs. Space Providers) with distinct management interfaces.
- Built dynamic administrative control center to review submitted spaces, process booking requests, track analytics, and manage community posts.
- Deployed containerized instance on private VPS via **Coolify & Docker** with **MySQL** and SSL/CDN security layer.

Stack: Next.js · React · Node.js · Tailwind CSS · MySQL · Coolify · VPS · Docker · Git

Bosala (بوصلة المتاجر) — E-Commerce Intelligence SaaS

 [Live Demo \(bosala.best\)](#) | 2025 – 2026

SaaS platform providing Saudi e-commerce entrepreneurs with real-time market trend insights and profitable product discovery.

- Implemented automated Python scraping jobs executing daily data harvesting, product price analytics, and automated report syndication.
- Constructed real-time visualization dashboards with charts, trend alerts, and clean UI using **Next.js**, **Tailwind CSS**, and **Supabase**.

Stack: Next.js · React · Python (Scraping/Automation) · Supabase (PostgreSQL) · Vercel · Tailwind CSS · REST APIs

Kawadir (كوادر) — Human Resource Management System (HRMS)

 [Live Demo \(kawadir-hrms.pages.dev\)](#) | 2025

Enterprise HR platform automating employee lifecycles, attendance, payroll calculations, and organizational hierarchies (Graduation Project).

- Built backend with **ASP.NET Core Web API** using Clean Architecture, Repository Pattern, Dependency Injection, and **JWT / RBAC**.
- Developed responsive frontend with **Angular**, Cloudinary media storage, containerized with **Docker** on Render behind Cloudflare CDN.

Stack: ASP.NET Core · Angular · TypeScript · C# · PostgreSQL · Docker · Cloudflare · Render · JWT

StockMaster — AI-Assisted Inventory Management System

 [Live Demo \(stockmaster-48q.pages.dev\)](#) | 2025

Smart inventory tracking platform integrated with an LLM conversational assistant for real-time stock insights and reorder forecasting.

- Integrated **Groq API (LLM)** to query inventory state in natural language and receive automated restock suggestions based on sales velocity.
- Full end-to-end delivery: relational schema in PostgreSQL, RESTful API with ASP.NET Core, and Angular dashboard.

Stack: ASP.NET Core · Angular · C# · PostgreSQL · Groq LLM API · Docker · Bootstrap · Render

EDUCATION

B.Sc. in Computer Science — GPA 3.54 / 4.0 (Very Good / Honors)

2022 – 2026

Al-Balqa Applied University (BAU) | Jordan
