PROFESSIONAL SUMMARY

Recent Computer Science graduate (GPA 3.53) with strong computer literacy, fast and accurate data entry, and proven experience explaining technical work clearly to professors, evaluation panels, and non-technical contacts. Software development background plus certifications in IT Support, Linux, and System Administration give an above-average ability to understand systems and troubleshoot issues, alongside solid MS Office skills. Reliable, detail-oriented team player and fast self-learner, currently preparing for IELTS (current English level: B1). Seeking a customer service, data entry/administrative support, or IT support role.

KEY SKILLS

- **Communication & Presentation:** Defended a technical project before professors and a student audience, answering unrehearsed questions; regularly explains technical work in plain terms to non-technical contacts.
- **Data Entry & Computer Proficiency:** Over a decade of daily, intensive computer use; fast and accurate with data entry and multiple software systems.
- **MS Office (Word, Excel, PowerPoint):** Practical experience preparing documents, reports, and presentations in Word and PowerPoint; can design spreadsheets and apply core Excel functions (formulas, basic lookups, sorting/filtering).
- **Remote Collaboration Tools:** Regular use of Zoom, Microsoft Teams, and Google Meet (e.g., online university sessions).
- **Teamwork & Coordination:** Delivered a graduation project as a 2-person team, dividing and coordinating frontend/backend responsibilities.
- **Problem-Solving & Troubleshooting:** Methodical approach built through debugging technical systems; certified in IT Support, Linux, and system administration.
- **Time Management / Self-Learning / Attention to Detail:** Consistently completed multi-week projects and training on schedule; independently learns new tools and systems; accuracy-focused in all tasks.
- **Informal Technical Support:** Regularly provides hands-on troubleshooting for family and friends (computers, mobile devices, accounts) over several years — patient, practical problem-solving with non-technical users.
- **Multitasking:** Regularly managed multiple concurrent commitments (university coursework, Red Hat certifications, and the graduation project) during the same periods.
- **Working Under Pressure:** Successfully delivered under real time pressure, including graduation project deadlines and timed exams.
- **Social & Interpersonal Skills:** Maintains a wide, active social circle and regularly participates in social events and gatherings.
- **Documentation & Reporting:** Experience writing structured reports and documentation, including academic reports and project usage guides.
- **Languages:** Native Arabic; English (B1), currently preparing for IELTS.

EXPERIENCE & TRAINING

Full Stack Web Development Training — ASP.NET Core & Angular | Princess Sumaya University for Technology (PSUT) | 2025

- 100-hour intensive training combining instruction with hands-on project work; regular collaboration with instructors and peers under deadline pressure.

Graduation Project — HR Management System (2-person team) | Al-Balqa Applied University | 2025-2026

- Owned frontend and part of backend; coordinated with a teammate on backend/database/documentation. Presented and defended the project before a university panel.

Volunteer Work

- Participated in volunteer activities involving coordination and direct interaction with others outside a formal work setting.

EDUCATION

B.Sc. in Computer Science — GPA: 3.53 / 4.0 | Al-Balqa Applied University, Jordan | 2022 – 2026

CERTIFICATIONS

- Full Stack Web Development — ASP.NET Core & Angular, Princess Sumaya University for Technology
- System Administration II (RH134) — Red Hat, Ver. 9.3, 40 Credit Hours, July 2025
